## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 20, 21, 39 and 41 are rejected under 35 U.S.C. 102(b) as being anticipated by Ansimov et al. (RU Pat. No. 2066350)(“Ansimov”) for the reasons set forth in the last Office action.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 22-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ansimov for the reasons set forth in the last Office action.

### ***Response to Arguments***

Applicant's arguments filed 10/28/04 have been fully considered but they are not persuasive.

Applicant argues that the cited prior art does not anticipate the rejected (under 102) claims because the there is no mention of the process limitations (claims 20 and 21) of the use of both a fermentation organism and a enriched yeast. Because the enriched yeast is a fermentation organism, the limitation is met by the production of beer yeast that is enriched. With regard to the necessity of Asimov teaching a fermentation. It is noted that the instant specification mentions that the fermentation organism can be yeast.

Applicant also argues that there is no teaching of the process step of a fermentation. The abstract teaches that the viability of the produced beer yeast is enhanced. The reference to viability, or course, is a reference to its use in the fermentation of beer.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
